PRO-SEEDER

Commercial Full Sun | Light Shade

DESCRIPTION:

Pro-Seeder is comprised of components selected for their ability to adapt to different maintenance programs. If managed with a higher level of inputs, Pro-Seeder will respond with a dark green color, a fine leaf texture and the density associated with a mixture costing significantly more! If a lower management protocol is utilized, Pro-Seeder will maintain turf quality longer than before going dormant. Pro-Seeder is designed for areas of full sun exposure but it will transition to light shade allowing it to be a very versatile mixture.

MIXTURE HIGHLIGHTS:

- Quick establishment of ryegrass & fescue in 5 days +/- .
- Adaptable to high / low maintenance makes it an ideal institutional / commercial use mixture.
- Fine leaf texture.
- Aggressive rhizomes promote recovery and enhance wear tolerance.
- Fast spring green up.

COMPOSITION:

Kentucky Bluegrass	20% Moonstruck	
	20% Pivot	
	10% Shamrock	
Perennial Ryegrass	15% Grandslam	
	15% Interlude	
Fine Fescue	20% Boreal Creeping Red	

Like or better cultivars may be used based on availability and market conditions.

Seeding Rate / 1000 SF.	Maintenance Level	Water Per Week	Fertilizer Apps/Yr.	Mowing Height	Lbs/Bag
4 to 6 lbs.	Low to Moderate	0.5" to 1.5"	1-2 +	2.5" +	25 & 50

SPECIFICATIONS:

Ramy Turf Products uses the highest quality seed available and always selects material based on proven local and regional study and evaluation by third party, independent organizations.

Reliably promised: 98% + purity and 99.99% weed and other crop free!
