## Dependable, Smart. Naturally.

## Specifications

## Product Name: <br> Revision Date: <br> Manufacture Facility:

Second Nature® Wood Fiber Plus Mulch
April 2012
Canton, OH

## 1. Product Identification

Second Nature Wood Fiber Plus Mulch is manufactured from virgin wood chips. It is non-toxic, 100\% biodegradable, and contaminant free. A polymer based tackifier is premixed during the manufacturing process.

## 2. Mixing

Mix Second Nature Wood Fiber Plus Mulch with approximately 100 gallons of water per 50 pound bag. Seed, fertilizer and soil amendments may be added at specified rates for one step installation of hydro seeding and erosion control projects.

## 3. Application

Second Nature Wood Fiber Plus Mulch can be applied after adding seed and fertilizer or as a separate application. Good soil preparation is essential. Slurry containing seed and fertilizer is best applied from the hose by pointing the nozzle straight down to drive the material into the soil. The application should then be topped-off by allowing the material to "rain on" the surface to achieve approximately $85 \%$ coverage.
Minimum Application Rate: 1,500 Pounds / Acre.

## 4. Equipment

Second Nature Wood Fiber Plus Mulch is mixed and applied with a standard hydro seeding machine.
Note: A mechanically agitated hydro seeding machine is recommended. Follow equipment manufacturer's installation instructions and recommendations.

## 5. Product Composition / Property Values

Wood Fiber (minimum)
Tackifier
Moisture Content
Toxicity
Water Holding Capacity (minimum)
Applied Color

## 6. Packaging and Shipping

## Bag Dimensions, Net Weight Pallet Dimensions, Quantity
